Site instructions are issued only for the purpose of recording any clarification or interpretation of the contract documents or giving direction on problems resulting from field conditions. These instructions are subject to the provisions of the contract documents and unless stated herein and specifically co-authorized by the Client, will not affect the contract. Should the Contractor require a change in the contract price or project schedule, he/she shall submit to the "Client" within ten (10) days of the date hereof, an itemized proposal. If the proposal is accepted by the Client, this site instruction will be superseded by a Change Order issued by the Client.

No.	Description	Reference Drawings
	<i>This site instruction deals with curb height modification of slab edges on Level 7 along the south elevation terraces.</i>	
.1	Reduced the curb height of the slab edges by 25mm (Elev. 99.715) on Level 7 along the south elevation terraces. <i>Toro Aluminum's sliding door clear opening at Level 7 terraces is to be increased by 50 mm from that indicated on the current window wall shop drawings. This will be accomplished by lower the curb height by 25 mm as noted above, and using the "Junior" size vent wall boxes. (25 mm smaller than the Standard wall box). Toro Aluminum will need to revise their shop drawings for the effected window wall panels.</i>	A7-11, A9-40, A9-41, A9-42
N.B.	All referenced drawings are available for immediate download from the KIRKOR/Newforma InfoExchange for a period of 60 days. All referenced drawings have been uploaded to the Astley Gilbert DFS for immediate printing / access.
