20	Acer x freemanii	Freeman Autumn Blaze	80mm	Good	Planted by WT 2014	1.2 m

Tree Protection Barriers

- Tree protection barriers must be 2.4m (8ft) high, plywood clad hoarding or an equivalent approved by Urban Forestry Services.
- Tree protection barriers for trees situated on the City road allowance where visibility must be maintained can be 1.2m (4ft.) high and consist of orange plastic web snow fencing on a wood frame made of 2"x 4"s.
- Where some excavate or fill has to be temporarily located near a tree protection barrier, plywood must be used to ensure no material enters the Tree Protection Zone.
- All supports and bracing should be outside the Tree Protection Zone. All such supports should minimize damaging roots outside the Tree Protection Barrier.
- No construction activity, grade changes, surface treatment or excavations of any kind is permitted within the Tree Protection Zone.
