## WHO NEEDS A COTTAGE WHEN YOU CAN SEE THE LAKE FROM YOUR BEDROOM?

Toronto has designed the ultimate summertime destination along the picturesque Queens Quay, offering everything from boat tours to outdoor movies to stand-up paddleboarding rentals. This iconic area has become so popular that people are making this neighbourhood their top choice when it comes to places to live.

There are activities for all skill-levels and preferences; you can hop on a ferry or cruise and enjoy a calm ride to the Toronto Islands, try your luck at windsurfing, engage your core and go stand-up paddleboarding, or, if you own a watercraft or jet ski, create your own adventure on Lake Ontario.

There are plenty of opportunities to socialize and meet new friends. Woodbine Beach has some of the best beach volleyball courts which attract crowds of active players who come prepared to serve, dive and volley all day long. Someone will always need a sub, so don't be shy about asking to join.

Both Echo Beach and Molson Amphitheatre host the city's most popular artists and festivals, and they cater to all genres from country to hip hop to EDM. Don't be surprised if all that activity provokes your appetite. People who love to eat and drink are never disappointed with the selection of food and beverages available in the community. Many of the restaurants are open late so you can experience a different side of the Waterfront once the sun sets.

# A FOODIE'S DELIGHT

St. Lawrence Market has served the population of Toronto for over two centuries, making it one of the city's most storied landmarks. The first permanent farmer's market was established in 1805 and destroyed in 1849 when a massive fire wiped out the building—and much of the city. The Market was rebuilt, demolished, and rebuilt again. Today, it has become one of the best spots to purchase farm-fresh produce, delicious soft bread, and succulent meats. It's also home to independent food and art vendors, small businesses and the occasional festival, including the annual Toronto

there are a handful of places you must eat at.

#### Buster's Sea Cove

Serving up the freshest fish in the city, Buster's Sea Cove has become a household name. They've grown so popular that they were even featured on an episode of Food Network's Eat St.! You can eat healthy at Buster's and get your fish grilled, or indulge and get it deep-fried the old-fashioned way.

#### Carousel Bakery

If you're passing by the Carousel Bakery, don't leave without getting one of their world famous peameal bacon sandwiches. Even celebrities like chef Emeril Lagasse and rapper Drake are big fans of this sandwich. In addition to the drool-worthy peameal bacon, Carousel Bakery also offers a delicious selection of sandwiches and wraps, international breads and Montreal style bagels. If you're craving carbs, this is the place to come.

#### Mustachio Sandwiches

The Italian veal and eggplant parmigiana sandwiches at Mustachio's are consistently voted the best in Toronto. The eatery combines thin slices of veal, eggplant and chicken, drenches it all in batter and then fries the ingredients to golden perfection. Everything is made-from-scratch and prepped daily.

#### Caviar Direct

Those who enjoy culinary delicacies will want to stop by Caviar Direct. They are world famous for serving limited availability, ethically sourced luxury foods such as foie gras, seasonal truffles and of course caviar.

#### Honey World

Liquid gold is for sale at Honey World. They source their honey from New Zealand because it is free of bee diseases that are common in most other countries in the world. Honey World sells a variety of different sweet treats, and you can order their products online if you miss them at the Market.

# YOU'VE ARRIVED AT YOUR DESTINATION

Train, plane or watermobile, every mode of transportation is welcome along Toronto's waterfront. Queens Quay has always been the ideal place to come for a relaxing walk or scenic jog, but now many working age people, especially those 25 - 40, are making this winsome area their permanent home. The influx of residents has led to a greater demand for a comprehensive transit system, and the city has been working diligently to deliver long-term integrated transit solutions.

Because the waterfront is a complex community with varying interests and expectations, a multitude of transit options have been incorporated into the area, and even more connected solutions are on their way.

#### Billy Bishop Airport

One of the most unique features of Toronto's waterfront is the Billy Bishop Airport. Located on the Toronto Islands, this airport can be easily accessed from the bottom of the city via ferry or the new pedestrian tunnel. Because Billy Bishop is smaller and less busy than Pearson International Airport, the check-in and boarding process is quicker and the experience is more enjoyable.

Billy Bishop was named one of the top airports in North America in both the Airports Council International's 2015 Airport Service Quality Awards and Skytrax 2016 World Airport Awards, and it was also recognized as one of the Top Ten Most Beautiful Airport Approaches by Private Fly and was a finalist in the World Business Travel Awards.

#### Cruise Boats

Day and evening cruises run frequently along the Harbourfront, and will take you all around the Toronto Islands while you enjoy a buffet style meal and music spun by a professional DJ. You can also take a shorter boat ride to the Islands and explore the many hidden gems waiting to be discovered.

#### Water Taxis

Need to get from east to west in a hurry? Hail a water taxi. They are cheap and fast, and best of all: they don't have to stop at any red lights.

#### Car

If you're up for maneuvering busy city streets and hunting for parking, driving your car can be a great option in this conveniently connected location. Don't have your own car? A plethora of taxis, Ubers and CarShare vehicles can be found at the water's edge.

#### Trails

If you'd rather run or walk to your destination, the Martin Goodman Trail is a picturesque car-free route to travel on. It connects to the Lower Don River Trail in the east of the city, and the Waterfront Trail in the west.

#### Bikes

Biking is big in the waterfront neighbourhood. A new bike path was installed along Queens Quay last year and nearly 600 cyclists an hour were reported travelling the waterfront during some peak periods! If you don't own a bike, you can always rent one from Bike Share Toronto. There are six stations located along Queens Quay for your convenience.

#### TTC

Finally, the TTC offers commuters even more options for getting around. Union Station is less than a 10-minute walk north of the water, and the 509 and 510 streetcar run frequently along Queens Quay.

## TORONTO ISLAND HOP

THINGS WORK A LITTLE DIFFERENT WHEN YOU'RE RUNNING ON

# ISLAND TIME

One of Toronto's most pristine treasures is just a short boat ride away. Enclosed by Lake Ontario, the Toronto Islands provide endless ways to make the most of summertime. Each island has its own characteristics and qualities, so it may take a few visits before you can identify a favourite.

All fourteen sandwich options come with a side salad. You'll know the The Power Plant Contemporary Art Gallery when you see it, as the tall smokestack gives it away. What once held the equipment to generate power for over 50 years, now contains a regularly changing installation of contemporary art from around the world. You might find it challenging to keep your eyes on the art though, and not on the soaring two-storey wall of windows that look directly onto the shimmering blue waters of Lake Ontario – but try to concentrate on the art as it is inevitably interesting stuff!

## THE OPERA HOUSE ↓

(416) 466-0313

[theoperahousetoronto.com](http://theoperahousetoronto.com)

**Admission: Ticketed Price**

Built over a century ago as a place for vaudeville shows and silent movies, The Opera House certainly has a long history. While thousands have entertained from its gilded stage, there is no record of there ever having been an opera held there, making its name a bit of a mystery. Regardless, lovers of live music will agree that it's a great place to see a concert, hosting acts from all over the world including some bigger local names too. Grab a casual meal in their restaurant, where the burger is said to be one of Toronto's best.

## HARBOURFRONT THEATRE →

231 Queens Quay West  
(416) 973-4000

**Admission: Ticketed Price**

Also found within the former power plant building is The Harbourfront Centre Theatre, a multi-use venue for theatre, dance and music. A ticket to a Harbourfront show includes the opportunity to see a remarkable permanent large-scale artwork by Canadian artist Sarah Hall, called "Waterglass". This 1,736 square foot wall, visible only from inside the theatre lobby, is made of glass panels that are hand-painted with over 360 images depicting the history of Lake Ontario. Being the first in the world to employ the technology, the piece generates solar energy that is used to light the lobby.

A SEA OF BUSINESS SUITS AND FANCY LADIES. THE BEST BARS IN THE CITY. THE FINEST RESTAURANTS ON THE SOUTH SIDE. THAT'S THE FINANCIAL DISTRICT. AND AQUABELLA BAYSIDE IS RIGHT ALONGSIDE.

Toronto's central business district is home to a multitude of bankers, stockbrokers, lawyers and business executives. Skyscrapers and high-rise buildings surround the bustling streets of this downtown Toronto area between Bay and King, and because this area houses the Toronto Stock Exchange, it is known as one of the most common industry divisions in the finance and insurance sector. And, with the Hines' two sky-scraping office towers, the opportunities in the district are beyond endless.

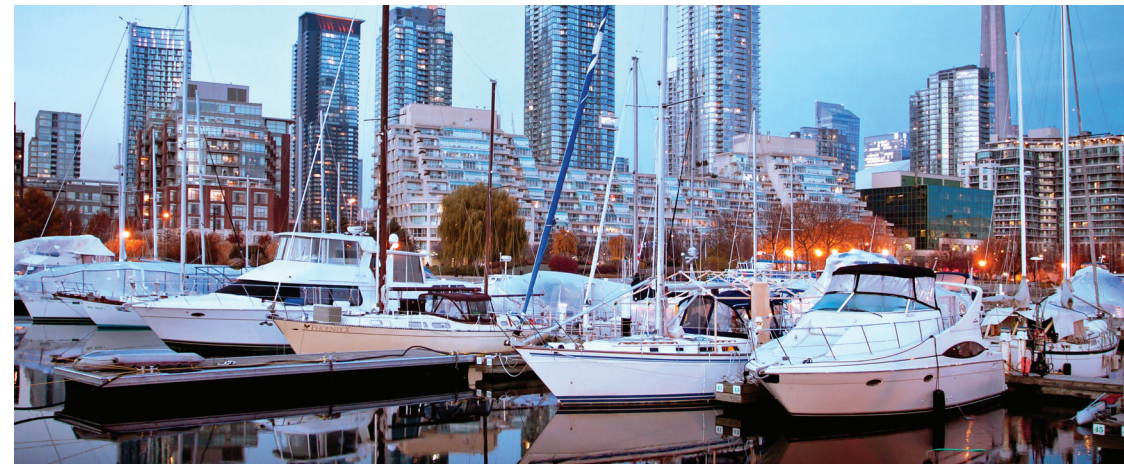

It's estimated that 100,000 commuters enter and leave the Financial District each working day! With public transport links to Union Station at the south end of the Financial District, and the GO station connection, the district opens its arms to everyone. Aquabella is walking distance from the financial district, so you'll always have the upper hand.

# WATERFRONT TOMORROW

A CANDID DISCUSSION ABOUT THE REVITALIZATION OF TORONTO'S WATERFRONT AND AQUARIUM IN ITS CHANGING LANDSCAPE.

Christopher  
Glaisek Meg Davis

**Q:** *What amenities are currently in the planning stages for Toronto's waterfront?*

**Chris:** Our next big project is the naturalization of flood protection for the Don River. We're going to build a whole new riverfront park section on either shore of the river. There will be a wetland installation and there will be more traditional park space to really extend the whole Riverdale park ravine system of the lower Don. It will have habitat, passive recreation and active recreation.

**Meg:** To accompany that, we are purchasing some derelict industrial land outside the flood plain to build communities around the new river. So there will be places to live and work along-side this beautiful new ecosystem. These will be full, complete communities with schools, daycares, retail, office and residential.

**Q:** *Any other projects?*

**Meg:** We also have a mid-range project called Quayside (that's just our working title), and it could be anywhere from 5 to 15 acres. This whole initiative will be the next step in our sustainability, technology, efficient systems and green building philosophy. Part of this initiative will be the expansion of the East Bayfront LRT along a new, revitalized Queens Quay. So there will be lots of opportunity for residents at Bayside to enjoy the transit and all the other amenities that we will have in the Quayside project.

**Q:** *How will the revitalization of the waterfront change the dynamic of Toronto?*

**Q:** *What is the next generation in urban planning and how might this impact our development of the waterfront?*

**Chris:** Today, planning climate-positive communities means thinking about where we're putting buildings, how we're protecting for the possibility of solar gain, for passive energy capture, for more active solar systems on roofs and these types of things. You're going to see neighbourhoods shaped by their relationship to renewable energy sources. It's interesting and exciting, and I think we're at the forefront of this new way of thinking. We're really taking our planning to a level that is only just being tried now in places around the world.

# THE FUTURE OF HARBOURFRONT

These are exciting times along Toronto's downtown waterfront. East of Yonge Street, where previously underused and underappreciated industrial land is experiencing an urban transformation, our city is creating a vibrant network of live/work/play communities as a legacy for future generations. Here are a few of the changes that will be making waves on Lake Ontario in the years to come.

*"Twelve years ago we made it our mission to work with our partners to ensure that The Living City, our vision of sustainability, was built upon a natural foundation of healthy rivers and shorelines, greenspace and biodiversity and sustainable communities. In that time, we have worked with a great many partners to move the sustainability agenda forward across the Greater Toronto Area and beyond. I am pleased to say that one of those partners is Waterfront Toronto. Since the formation of Waterfront Toronto in 2001, about the time we adopted The Living City vision, we have worked closely with them to create and implement projects designed to transform the waterfront and make it a world class example of sustainable development and redevelopment."*

## NEW MOUTH OF THE DON RIVER

Some of Toronto's Port Lands are at risk of flooding from the Don River Watershed. The city is naturalizing the mouth of the Don River, rerouting it from its current location at the Keating Channel to the middle of the Port Lands.

## KEATING CHANNEL PRECINCT

The Keating Channel neighbourhood will be the first Lower Don Lands community – a vibrant, mixed-use community featuring parks and promenades along the water's edge, shops and canal-side cafés.

## VILLIERS ISLAND

Surrounded by water on all sides below the Keating Channel, Villiers Island will measure approximately 88 acres (over six times the size of the Distillery District), comprised of 1/3 parkland and 2/3 mixed-use development.

## SILO PARK

With the waterfront's iconic silos a designated heritage site, the plan is set to expand the canvas to nearby 333 Lake Shore Boulevard and create a wonderful public park around these magnificent structures.

## BAYSIDE BUSINESS PARK

Bayside's master plan includes over 500,000 square feet of office space – a major port of call along Toronto's future innovation corridor.
